

- A Grinder for frozen block with elevator
- B Recipe preparation by weight of batch material
- C Final grinding of raw material batch
- D Gravy preparation and storing
- E Mixing/Emulsifying/Pumping
- F Duplex Collection/Storage silos/ Vessels with pump, color injection/mixing and feeding into thead extruder
- G Thread extruder of emulsified meat
- H Steam Tunnel
- I Evaporative air cooling tunnel
- J Rotary thread cutter
- K Reversible collection/Transfer-belt
- L Reversible, Product accumulation-belt
- M Beltslicer (Second cut)
- N Elevator /Multiheadedweigher and pouch making/forming and filling machine
- O Transferconveryer with check weigher and reject system
- N2 Elevator/Volume filling and Brik Forming/Filling machine
- O2 Transfer/Acumulation (Serpentine) conveyer with check weigher and reject system
- P Transferconveyer and robotic autoclavebasket loading system
- Q Fullautomatic shuttle autoclave loading/un-loading system
- R Autoclave equipment
- S Collection/Transfer and robotic un-loading system
- T Return Conveyer for empty Trolley/Baskets
- U Air-Drying machine for pouches
- V Fullautomatic Filling/Packing machine for pouch in display cartons
- X Full automatic palletizing of cartons with plastic wrapping equipment
